Powerplay Instant Cricket System

Cricket for everyone, everywhere!

The Powerplay Instant Cricket System is a fantastic new way to encourage people of all ages to discover and enjoy cricket - bringing the game to places it's never been before!

Exclusive to Notts Sport the pitch opens up exciting opportunities for providing training and recreational matchplay on sprung wooden floors and existing artificial turf surfaces, such as 3G, Multi-sport, sand-filled or sand-dressed.

This pioneering system means that operators of existing artificial turf facilities, including schools and sports clubs, who have previously been unable to offer cricket, can now do so.

Powerful performance

As you'd expect from leading artificial cricket pitch supplier Notts Sport, the Powerplay Instant Cricket System doesn't compromise on performance.

Exclusive to Notts Sport, the durable synthetic turf surface caters for both spin and seam, and offers good grip underfoot, while the surface colour enables the ball to be viewed more easily.

The unique design helps regulate ball bounce as well as providing player comfort, while the Powerplay strips ensure the mat lies flat and provide a smooth run-up for bowlers.

You can be confident that players will enjoy the realistic cricket experience, without the disappointment of cancelled matches, as the porous surface of both the pitch and it's surrounds can be used even after heavy rain.

Cricket in an instant

The Powerplay Instant Cricket System is no hassle to set up at the start of a session as the pitch can be rolled out in just five minutes.

The system comes complete with a special trolley to ensure the surface retains its shape and performance characteristics between games.

The trolley also makes it a breeze to move, install and store.

Cost-effective investment

The Powerplay Instant Cricket System provides cricket facilities at a fraction of the cost of installing a new cricket pitch.

There are far fewer of the maintenance costs associated with grass cricket pitches and the hard-wearing artificial turf carpet has a long lifespan.

For schools, sports clubs and other operators of existing artificial turf facilities, it also opens up a whole new range of revenue-generating possibilities.

And with many artificial turf pitches already installed under floodlights, the new system makes floodlit cricket accessible to all.

One 24m x 1.9m sized surface complete with storage trolley, roll up core and six stabiliser strips: price £4,000 + VAT

Two 12m x 1.9m sized surfaces complete with storage trolley, roll up core and twelve stabiliser strips: price £4,395 + VAT
